

FORCE

full power

Driven by a high-speed motor

- 100% copper coil motor
- Releases strong power with a motor with a power of up to 1450W or equivalent to 2 horsepower
- Thermostat controls the operating temperature of the motor

Air Pump Head Features

The large cylinder's anodized coating enhances longevity, strength, and durability. The pump head also features a large valve plate.

Continuous Air Power for Every Use

Airflow rate of 304 L/min with 1 air pump head, more than 2.4 times compared to a typical oil-free air compressor. General air compressor speed (0-8 bar) takes seconds to fill the tank*. (Oil-free air pump)

PUMA Oil Free Compressor

Model	FORCE-35	FORCE-55	FORCE-120	HUSH-25
